Index of Flood Events

- #1 Flood on Kingswood
The weather allowed 7" of rain the same flood water in April 2011 and May 2014. How much less water came on 10/20/24?
- #2 Flood on Kingswood
In between these rain events 2024, the water was so low you could actually walk across without getting feet wet.
This photograph in our submission is close to the lowest level of the water I have pictures of, but the water level has been even lower and completely dry outside the house.
- #3 Flood on Kingswood road
I'm assuming the date from the calendar
- #4 Flood over Spring road
November 2011 and regularly prior.
- #5 Flood in Golfwood close, High Street, I'm checking the date
- #6 Flood in Lee Andy court, Regularly during the 11 years the resident has occupied the site.
- #7 Flood on South side of Central Esplanade road, November 2015 and regularly prior.
- #8 Flood over Central Esplanade road, November 2015 and fairly regularly prior.
- #9 Flood in the north end corner road, close to Central place, about 2017.
- #10 Flood in Chubbuck Park, off Howard road where regularly, major rain events, 2018?

How many have happened before us? Page 1 of 1

Eroded banks probe

A safety assessment is being conducted on Englewood Retarding Basin due to its "structural condition".

Madison Water started geotechnical testing on the retaining structure in Englewood Retarding Basin, which is a concrete, gravity structure. It noted that the assessment could occur during the investigation and repairs are needed. The contractor is the safety of the community with this area and address which is why extra safety actions to understand the risks associated with the basin around the Englewood Retarding Basin. Madison Water regional administrator, George P. Kelly, said.

The basin plays an important role in storing runoff water from built-up areas and reducing peak flows, and we have a responsibility to make sure it is safe and functioning properly now and into the future. Today, our Madison Water routinely inspect the site and condition of its 2,000 structures of retention and 15,000 feet of retaining structures. Residents can contact Madison Water on the basin investigation via water@madisonwater.com.

Continuing for on 11/20/21

With all these flood photos, why no floods recently?

💧 **Floods are coming!** 💧

We just had a long dry, but wet is predicted!

7news.com.au

Melbourne's April was the second hottest in 169 years of records
